

# Timber Venetian Colour Selector

## Fibrewood 50mm

Used as an economical alternative to timber in our Venetian range, Fibrewood is made from expanded foam polymer with a special UV fade resistant coating. Fibrewood is fade resistant and resists peeling and cracking. Completely washable, this product will not absorb moisture and is suitable for wet and humid areas including bathrooms and kitchens.

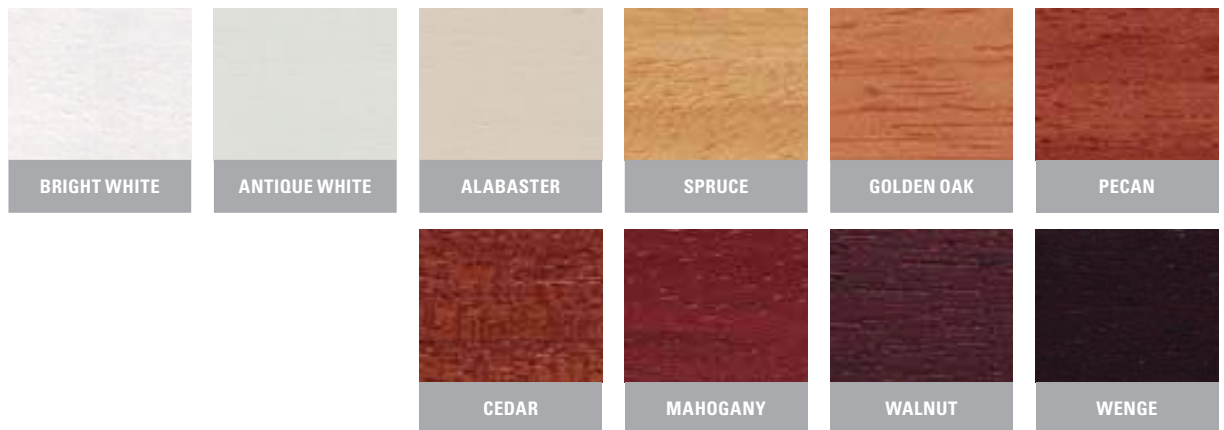

## Fibrewood 65mm

## Timberline 50mm

Finished using the latest in UV fade resistant oil and lacquer, timbers are used to add warm, natural finish to our Venetian range. To highlight natural grain, slats are evenly graded and vacuum coated in a single pass to ensure all four sides of each slat have a completely even finish.

## Cedarline 46mm, 60mm & 84mm

Vertilux cedar is aerated and naturally dried prior to manufacture, increasing its attractiveness and durability. It exceeds Australian standards for colourfastness and fade resistance.
