"Banwa Private Island, celebrate for its unique retreat experience, aimed to integrate exclusivity seamlessly with modern advancements. The selection of Motorised OneBlinds was made to enhance the guest experience, offering a delightful fusion of luxury, privacy and state-of-the-art functionality."

Objective

To provide a blind system to compliment the minimalist design objective, wide window spans, and seamlessly integrate into the existing architecture without hindering the panoramic views.

The Solution

Banwa Private Island embraced Motorised OneBlinds to enhance guest comfort and privacy, providing the minimalist elements they were looking for to seamlessly blend into the island's exclusive ambiance. These blinds were recessed into the ceiling, allowing them to be obscured when not in use, offering guests uninterrupted views of this natural haven to enrich their overall experience.

The project exemplifies how technology can be integrated into an exclusive natural haven, creating an ambiance where luxury meets innovation, and every moment is an escape into tranquility. Each villa is a sanctuary, and every detail is designed to amplify the essence of exclusivity and sophistication.
