### Overview

---

Location: Niseko, Hokkaido, Japan  
Distributor: Luxview Pte Ltd  
Product: OneBlinds  
System: Motorised  
Qty: 350

"Park Hyatt Niseko, nestled in the picturesque region of Niseko, Japan, opted for Motorised OneBlinds to preserve uninterrupted views. These blinds seamlessly blend into the luxurious ambiance, offering guests both aesthetic appeal and functional convenience."

---

### Objective

To create an aesthetically pleasing and comfortable atmosphere for guests, while also addressing practical considerations such as privacy, temperature control, and noise reduction, along with durability for high-volume usage and maintenance.

### The Solution

In aiming to mirror the iconic elegance of the Park Hyatt brand, the hotel seamlessly integrated Motorised OneBlinds into its design ethos. These blinds not only provide functional light control but also contribute to the overall cohesive design of the interiors. Occupying minimal space, the Oneblind System offered a clear advantage to the standard option of multiple blinds which would potentially hinder views.

Inspired by the surrounding natural beauty, the blinds become a subtle yet significant element in creating an ambiance of contemporary luxury. Offering motorisation added a touch of sophistication, enhancing the visual appeal of the space and embodying the essence of the Park Hyatt's commitment to refined living.
