

Sequoia Lodge, Mount Lofty

www.vertilux.com.au

Overview

Location:	Mount Lofty, SA
Architect:	David Fraser
Product:	OneBlinds
System:	Motorised
Qty:	50

"Sequoia Lodge at Mount Lofty showcases the sleek design of our ultra-wide OneBlinds' to achieve the ideal blend of privacy and openness, enriching the natural beauty of this location to provide you with an unforgettable experience."

Objective

To provide a blind system to compliment the minimalist design objective, wide window spans, and seamlessly integrate into the existing architecture without hindering the panoramic views.

The Solution

OneBlinds were identified as a natural choice due to the blind system occupying minimal space, and offering a clear advantage to the standard option of multiple blinds. Being capable of spanning up to 12 meters in width with no fabric splits it offers a sleek design that blends effortlessly into exterior architecture or interior design.

50 Motorised OneBlinds were integrated in pelmets to assist in providing a seamless and cohesive finish. These intelligent shading systems control light and temperature simultaneously without obscuring scenic views. Incorporating motorisation for ultimate energy control and effortless operation, helped them realise their architectural vision to provide a harmonious aesthetic throughout the lodge.
