“The installation of 14 Motorised Roman Blinds at Koko Teppanyaki Restaurant in Melbourne adds a layer of sophistication and comfort, ensuring an enhanced dining experience with optimised light and privacy.”

Objective

The primary objective for Koko Teppanyaki Restaurant in Melbourne was to enhance the dining experience by integrating elegant design elements that provide both aesthetic appeal and functional light control. The solution aimed to create a harmonious environment that complements the sophisticated ambiance of the restaurant while offering guests comfort and privacy.

The Solution

Koko Teppanyaki Restaurant in Melbourne presented a design challenge that required the perfect blend of style and functionality. To meet these demands, 14 Motorised Roman Blinds were carefully selected and installed. These blinds were not only chosen for their ability to deliver precise light control but also for their seamless integration with the restaurant’s refined interior. The Motorised Roman Blinds contributed to a luxurious and intimate dining atmosphere, enhancing both the visual appeal and the overall guest experience. energy efficient environment.
